Pharmacists who administer immunizations to their patients know that immunization guidelines change often. Keeping current with the latest information is imperative for pharmacists making recommendations to patients regarding their immunizations. Participate in Immunization Update 2012 to prepare for the influenza season and learn about the latest recommendations from the Advisory Committee on Immunization Practices.

Upon successful completion of this knowledge-based CPE activity, pharmacists should be able to:

1. Discuss new 2012 Advisory Committee on Immunization Practices (ACIP) recommendations and changes to the Center for Disease Control and Prevention (CDC) Pink Book regarding adult and pediatric immunizations
2. Review influenza vaccine considerations such as characteristics, schedule, contraindications, and precautions in preparation for the 2012-2013 season
3. List the steps for appropriate intradermal administration of the inactivated influenza vaccine
4. Evaluate a patient's immunization history to determine appropriate vaccine recommendations based on the appropriate immunization schedule
