The University of Iowa College of Pharmacy and the Collaborative Education Institute present:

University of Iowa College of Pharmacy Homecoming Seminar
7th Annual Cardiovascular Update:
Fight, Fight, Fight for Iowa's Heart Health

Friday, September 28, 2012
Iowa Memorial Union
132 Iowa Memorial Union
Iowa City, IA 52242

Click Here To Register!

Join us for the 7th Annual Cardiovascular Update associated with the University of Iowa's 2012 Homecoming weekend. The University of Iowa Health Science Colleges and UIHC are ranked among the top in heart health research, education and patient care. Come learn from the experts about the updated CHEST guidelines and medication management for anticoagulation.

Schedule of Events

7:30am – 8:00am
Registration

8:00am – 8:15am
Welcome & Introductions
Donald E. Letendre, PharmD
Dean, University of Iowa College of Pharmacy

8:15am - 9:45am
Anticoagulation Guideline Update
James D. Hoehns, PharmD, BCPS, FCCP
Associate Professor (Clinical)
University of Iowa College of Pharmacy and Health Sciences
UAN 107-000-12-060-L01-P 0.15 CEU/1.5 Hr
Prevention of thrombosis is an integral part of cardiovascular management, and it encompasses many different types of patients, indications and clinical goals. Pharmacists play a key role in medication management of antithrombic therapy, often through collaborative practice agreements. This activity will update participants on the latest CHEST guidelines for antithrombic medication management and focus on meeting treatment goals and optimizing patient care.
Upon successful completion of this application-based CPE activity, pharmacists should be able to:

1. Describe the components of the CHEST guidelines and their implications for patient care
2. Identify therapeutic targets and length of treatment for specific patient population
3. Investigate the new components and changes to the updated CHEST guidelines
4. Describe the implications of the CHEST guidelines in your practice setting

10:00am – 11:00am
Oral Anticoagulation: Focus on New Treatment Options
Deanna McDanel, PharmD, BCPS
Clinical Pharmacy Specialist, Ambulatory Care; Associate Professor (Clinical)
University of Iowa Hospitals and Clinics; University of Iowa College of Pharmacy
UAN 107-000-12-061-L01-P 0.1 CEU/1.0 Hr
This activity will introduce participants to new oral anticoagulants recently approved by the FDA or on the horizon. Clinically applicable properties and evidence will be discussed for dabigatran, rivaroxaban and apixaban. Participants will be on the cutting edge of the evolution in anticoagulation management and be able to discuss the place in therapy for these new oral agents.
Upon successful completion of this application-based CPE activity, pharmacists should be able to:
1. Recognize the new oral anticoagulant therapies that are recently FDA approved or currently in clinical studies
2. List common similarities and differences between all available oral anticoagulants
3. Recite the important prescribing information and patient counseling points that would be pertinent when managing or dispensing one of these agents
4. Summarize the key findings from the clinical studies of the new oral anticoagulants
5. Recommend the appropriate candidates for the new oral anticoagulants and where they may have a place in anticoagulation therapy

11:000am – 12:00pm
Clinical Debate: Old vs. New Anticoagulants
Ryan B. Jacobsen, PharmD, BCPS
Clinical Pharmacy Specialist, Ambulatory Care; Assistant Professor (Clinical)
University of Iowa Hospitals and Clinics; University of Iowa College of Pharmacy
John Swegle, PharmD, BCPS
Associate Professor (Clinical)
University of Iowa College of Pharmacy
UAN 107-000-12-062-L01-P 0.1 CEU/1.0 Hr
Always a crowd favorite, the clinical debate returns for another year! Now that participants have been introduced to the current guidelines and new agents in anticoagulation, this activity will debate the old vs. new anticoagulants. Participants will engage in the debate as two faculty members will present the pro and cons of warfarin compared to the new agents.
Upon successful completion of this application-based CPE activity, pharmacists should be able to:
1. Describe the advantages and disadvantages of using the novel oral anticoagulants in comparison to traditional agents such as warfarin
2. Compare and contrast the risks and benefits of warfarin
3. Compare and contrast the risks and benefits of new anticoagulants

12:00pm – 1:00pm
Lunch (provided)
Comments from Special Guest Jenelle L. Sobotka, PharmD, FAPhA
President, American Pharmacists Association

1:00pm – 2:00pm
Measuring and Monitoring Anticoagulant Therapy
Craig Logemann, PharmD, BCPS, CDE
Clinic Pharmacist
Iowa Health Physicians
UAN 107-000-12-063-L01P 0.1 CEU/1.0 Hr
Anticoagulation management is all about measuring and monitoring. This activity will focus on the importance of monitoring patients, including updated recommendations for warfarin monitoring. Participants will also investigate ways to assure success with new anticoagulants that do not have routine laboratory monitoring.
Upon successful completion of this application-based CPE activity, pharmacists should be able to:

1. Compare and contrast anticoagulant therapies and necessary monitoring
2. Evaluate current recommendations for warfarin monitoring
3. Investigate possible ways to assess efficacy and safety of new anticoagulants
4. Develop practice innovations that will assist patients in safe and effective anticoagulant use

2:15pm – 3:15pm
Anticoagulation Case Discussion
Ginelle Bryant, PharmD, BCPS
Clinical Pharmacist; Assistant Professor of Pharmacy Practice
Penn Avenue Internal Medicine; Drake University College of Pharmacy and Health Sciences
UAN 107-000-12-064-L01-P 0.1 CEU/1.0 Hr
Put your knowledge to work! This activity will actively engage participants in case examples to develop medication therapy plans using a practical and collaborative approach to care. The cases presented will involve special populations and focus on clinical pearls in anticoagulation management.
Upon successful completion of this application-based CPE activity, pharmacists should be able to:

1. Apply knowledge of the CHEST guidelines to select optimal medication management
2. Differentiate between medication choices and best treatment options for patients in special populations
3. Apply knowledge of current research to optimize patient care
4. Collaborate with colleagues to identify the role of the pharmacist in optimizing anticoagulation management

3:15pm – 4:15pm
Practice Innovations in Anticoagulation
Anh Thu Nguyen, PharmD, BCACP
Assistant Director of Clinical Services
Main at Locust Pharmacy Clinic and Medical Supplies
UAN 107-000-12-065-L01-P 0.1 CEU/1.0 Hr
This activity will showcase practice innovations with warfarin management in a community setting. Participants will be introduced to possible collaborative practice and billing solutions to provide direct patient Care and be introduced to opportunities to provide a PT/INR self-testing training service. Dr. Nguyen will share the challenges and opportunities of a successfully implemented anticoagulation management program.
Upon successful completion of this knowledge-based CPE activity, pharmacists should be able to:

1. Identify the pros and cons to starting an anticoagulation service
2. Describe the appropriate steps to implement a collaborative practice agreement

3. Evaluate opportunities for billing patients, insurance companies, and other contracted payers
4. Describe opportunities for pharmacist involvement with patient self-testing

4:15pm – 4:30pm
Wrap-Up/Adjourn/Go Hawks!

General Seminar Information:

Seminar Facility:
Iowa Memorial Union
132 Iowa Memorial Union
Iowa City, IA 52242

Lodging:
CEI has reserved a block of rooms for Thursday, 9/27/12 (only), at the Marriott Coralville Hotel & Conference Center. In order to receive our special rate of $110/night (tax not included), please call 1-800-848-1335 (or 319-688-4000) and mention you are attending the 7th Annual Cardiovascular Update. If you require lodging for Friday & Saturday nights (9/28 – 9/29) please refer to the lodging details and instructions under the University of Iowa's Homecoming hotel block.

Target Audience:
All alumni pharmacists, pharmacy residents, and student pharmacists of the University of Iowa College of Pharmacy and other pharmacists interested in cardiovascular management.

Continuing Education:
The Collaborative Education Institute is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. A total of 6.5 hours (0.65 CEUs) of CPE credit will be offered. A CPE Statements of Credit will be automatically generated upon achieving a passing grade of 70% on the online activity exam (CEI provides you with 2 opportunities to successfully completed the exam) and completion of the activity evaluation. You may print this CE Statement of Credit. CEI will also submit your credit to CPE Monitor within 45 days following the activity (with registered "CPE Monitor e-profile ID" in your CEI profile; visible to you within 60 days following the activity).

Seminar Fees:
The full educational activity, handout materials, lunch, and all breaks involved with the Homecoming Seminar – 7th Annual Cardiovascular Update are included in the seminar fees.

	Before or On 9/14:	**After 9/14:**
Pharmacists	**$90**	**$115**
Pharmacy Residents	**$55**	**$ 80**
Student Pharmacists	**$30**	**$ 55**

Cancellation and Refund Policy:

All participants are encouraged to register in advance. A $25 fee will be assessed for any registrations received after 9/14/12. At-the-door registrations will be assessed an additional $25. The refund policy is a full refund less a $25 administrative fee up to or on 9/26/12. There will be no refund given after 9/26/12.
